VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Please AMEND the following claims:

3. A variable polarization plane rotator according to claim 1, further comprising a reflecting plate for reflecting light,

wherein said variable polarization plane rotator has a reflection type construction in which said input light beam output from an input side optical path is transmitted through said phase plate and said phase difference variable element in succession, to be reflected by said reflecting plate, and again transmitted through said phase difference variable element and said phase plate in succession, to be input to an output side optical path.
